EFFECTIVE DATE**June 22, 2026****STATUS****Beta Draft For Counsel Review****SOURCE****automated-trading-authorization-draft.md**

This document is part of the Tetrahedron beta legal packet for Take Flight Data Management. It is formatted for user review and legal counsel review. It is not legal advice.

Automated Trading Authorization

Effective date: June 22, 2026

This authorization is a first draft for review by counsel. Do not publish until approved.

Authorization

By enabling automated trading, you authorize Tetrahedron to submit orders through your connected exchange account within the settings and limits you choose.

This may include:

- generating and reviewing trade proposals
- submitting buy or sell orders
- managing paper trading positions
- submitting live spot orders if live mode is enabled
- monitoring positions and exits
- pausing or blocking orders when safety controls fail
- creating audit logs, reports, alerts, and notifications

User Controls

You remain responsible for:

- choosing paper or live mode
- selecting exchange connections
- setting order size and exposure limits

- selecting execution style
- reviewing risk settings
- enabling Start, Stop, and Emergency Stop controls
- monitoring open orders and positions at the exchange
- revoking API keys at the exchange if needed

Limitations

Automation may fail, pause, repeat, delay, or behave unexpectedly because of software errors, exchange outages, stale data, API failures, account restrictions, market volatility, or configuration mistakes.

Tetrahedron does not guarantee that automation will prevent losses, capture gains, execute at expected prices, or avoid all unsafe conditions.

Consent Record

The product should record:

- user ID
- tenant ID
- timestamp
- trading mode
- exchange venue
- max size/exposure settings
- selected execution style
- enabled automation features
- acknowledgement text version
- IP/device metadata if appropriate

Revocation

You may stop automation in the product. You should also revoke or modify API keys directly at the exchange if you want to remove exchange-level trading authority.

User signature / electronic acknowledgment
