Exchange/API Connection Agreement

Take Flight Data Management

1620 W. Southern Ave #60

Mesa, AZ 85202

EFFECTIVE DATE**June 22, 2026****STATUS****Beta Draft For Counsel Review****SOURCE****exchange-api-connection-
agreement-draft.md**

This document is part of the Tetrahedron beta legal packet for Take Flight Data Management. It is formatted for user review and legal counsel review. It is not legal advice.

Exchange/API Connection Agreement

Effective date: June 22, 2026

This agreement is a first draft for review by counsel. Do not publish until approved.

Connection Authorization

By connecting an exchange account, you authorize Tetrahedron to use the API credentials you provide or approve to access your exchange account for the permissions you configure.

Depending on permissions, this may include reading balances, reading market/account data, reading orders, submitting orders, cancelling orders, and retrieving trade history.

User Responsibilities

You are responsible for:

- creating API keys at the exchange
- selecting appropriate API permissions
- avoiding withdrawal permissions unless expressly required and approved
- maintaining exchange-account security
- following exchange terms
- monitoring exchange orders and balances
- revoking API keys at the exchange when needed
- understanding exchange fees, limits, supported assets, and restrictions

Third-Party Exchange Risk

Exchanges are independent third parties. Tetrahedron does not control exchange uptime, APIs, fees, liquidity, account restrictions, delistings, withdrawal policies, custody, insolvency risk, rejected orders, forced liquidations, or regulatory changes.

Credential Handling

Tetrahedron intends to store exchange credentials encrypted at rest and tenant-scoped. No security measure is perfect. You should use limited-permission API keys, rotate keys when appropriate, and revoke keys if compromise is suspected.

No Exchange Affiliation

Unless expressly stated in a written partnership notice, Tetrahedron is not affiliated with, endorsed by, sponsored by, or controlled by any connected exchange.
