Tetrahedron Terms Of Service

Take Flight Data Management

1620 W. Southern Ave #60

Mesa, AZ 85202

EFFECTIVE DATE**June 22, 2026****STATUS****Beta Draft For Counsel Review****SOURCE****terms-of-service-draft.md**

This document is part of the Tetrahedron beta legal packet for Take Flight Data Management. It is formatted for user review and legal counsel review. It is not legal advice.

Tetrahedron Terms Of Service

Effective date: June 22, 2026

These Terms of Service are a first draft for review by counsel. Do not publish until approved.

1. Parties

These Terms govern access to and use of Tetrahedron, operated by Take Flight Data Management (**Company, we, us, or our**). **You** means the person or entity creating an account, connecting an exchange account, subscribing to the service, or otherwise using Tetrahedron.

2. Service Description

Tetrahedron is a supervised crypto trading operations tool. The service may provide market data, signals, scoring, AI summaries, trade proposal queues, paper trading, automation controls, reporting, notifications, and integrations with user-connected exchange accounts.

Tetrahedron is not a bank, broker-dealer, exchange, custodian, futures commission merchant, investment adviser, commodity trading adviser, or money transmitter unless we expressly state otherwise in a counsel-approved notice.

3. Eligibility

You must be at least 18 years old, legally able to enter a binding agreement, and located in a supported jurisdiction. You may not use the service if you are prohibited by law, sanctions restrictions, exchange rules, or these Terms.

You are responsible for confirming that your use of crypto trading tools, automated trading, exchange API access, and any connected exchange account is lawful where you are located.

4. Account Registration And Security

You must provide accurate account information and keep it current. You are responsible for safeguarding your login credentials, devices, API keys, and exchange accounts.

You must notify us promptly at Not yet designated if you believe your account, exchange connection, API key, or device has been compromised.

5. Exchange Accounts And Third Parties

You may choose to connect your own third-party exchange account. Your exchange account remains governed by that exchange's own terms, fees, rules, risk disclosures, API limits, asset availability, outages, and account restrictions.

We do not control third-party exchanges. We are not responsible for exchange outages, rejected orders, API failures, delayed data, liquidity gaps, slippage, fees, account restrictions, withdrawals, custody, insolvency, forced liquidations, or other third-party exchange actions.

6. User Authorization For Automation

If you enable automated trading, you authorize Tetrahedron to submit orders within the settings, limits, exchange permissions, and account credentials you configure. Automation remains bounded by the controls shown in the product, including start, stop, emergency stop, risk settings, venue selection, order style, size limits, and feature availability.

You remain responsible for reviewing configuration, account state, exchange permissions, proposals, risk controls, and results before and during automation.

7. No Guarantee Of Results

Crypto trading involves substantial risk. Tetrahedron does not guarantee profit, successful trades, execution availability, loss avoidance, uptime, specific fills, specific prices, or future performance.

Past performance, backtests, simulated results, paper trading, AI summaries, market signals, and user reports do not guarantee future results.

8. Paper, Simulated, And Live Trading

Paper trading and simulated trading are hypothetical and may differ materially from live trading. Simulated fills may not reflect actual order book depth, queue position, rejected orders, partial fills, slippage, fees, latency, exchange downtime, or real liquidity.

Live trading uses real exchange accounts and can result in real financial loss.

9. AI And Automated Analysis

AI-generated summaries, recommendations, labels, market regime analysis, and reports may be incorrect, incomplete, stale, or unavailable. You should not rely on AI output as a sole basis for trading decisions.

10. Acceptable Use

You may not misuse the service, evade controls, attack or scrape systems, share accounts, violate exchange terms, use the service for unlawful activity, reverse engineer restricted components, interfere with other users, or attempt to bypass risk, eligibility, or security restrictions.

11. Fees, Subscriptions, And Billing

Paid features may require a subscription. Subscription pricing, renewal terms, cancellation timing, refunds, taxes, failed payments, and plan changes are governed by the Subscription, Billing, and Refund Policy and any checkout terms shown at purchase.

12. Service Changes And Availability

We may modify, suspend, limit, or discontinue features, supported exchanges, assets, data sources, automation authority, or subscription plans. The service may be unavailable because of maintenance, outages, market conditions, third-party failures, security incidents, or other events.

13. User Content And Data

You retain rights in your data, subject to the permissions necessary for us to provide, secure, troubleshoot, analyze, and improve the service. Data handling is described in the Privacy Policy.

14. Beta And Experimental Features

Some features may be beta, experimental, research, paper-only, shadow-only, or not intended for live trading. Beta features may change, produce errors, or be removed.

15. Disclaimers

The service is provided **as is** and **as available** to the maximum extent permitted by law. We disclaim warranties of merchantability, fitness for a particular purpose, non-infringement, uninterrupted operation, accuracy, profitability, and error-free performance.

16. Limitation Of Liability

To the maximum extent permitted by law, Take Flight Data Management will not be liable for indirect, incidental, special, consequential, exemplary, punitive, or lost-profit damages, trading losses, lost opportunities, data loss, exchange failures, API failures, market losses, or third-party service failures.

Counsel to review whether any liability cap should be the greater of fees paid in the prior **[number]** months or **[amount]**.

17. Indemnification

You agree to defend, indemnify, and hold harmless Take Flight Data Management from claims arising out of your use of the service, your exchange accounts, your API credentials, your trading activity, your violation of law, your violation of exchange terms, or your breach of these Terms.

18. Termination

We may suspend or terminate access if you violate these Terms, create risk, fail payment, misuse the service, violate law, or use unsupported jurisdictions or prohibited exchange access. You may stop using the service at any time, but you remain responsible for your exchange account and any open positions or orders.

19. Governing Law And Disputes

These Terms are governed by the laws of **[Governing Law State]**. Disputes will be handled in **[Arbitration Venue]** unless counsel changes this section.
